

## AVORAL SHAMPOO

*Avalon Pharma*

### Composition

Each gram of avoral shampoo contains 20 mg of ketoconazole, sodium lauryl ether sulphate, PEG 120, propylene glycol, collagen, coconut, fatty acid diethanolamide, hydrochloric acid, disodium mono-laueyl ether sulphosuccinate, imidurea, sodium chloride, sodium hydroxide, erythrosine, ethanol, perfume and purified water.

### Pharmacology

Ketoconazole, a synthetic imidazole dioxolane derivative, has a potent antimycotic activity against dermatophytes such as trichophyton sp. Epidermophyton floccosum and Microsporum sp. And against yeast such as candida sp and malasszia spp.

### Properties

Avalon shampoo formula provides you with an effective way for removing dandruff and itching which are usually associated with seborrhoeic dermatitis of the scalp and pityriasis versicolor. The natural process of the scalp-cell renewal is accelerated when fitting off pityrosporum ovale causing dead cells to fall off faster. This a leading cause of dandruff and all the symptoms to that go with it: the flaking, scaling and itching. The antifungal properties of ketoconazole related to their ability to impair the synthesis of ergosterol, a component of fungal cell membrane maintain your hair vitality, texture and luster. Avalon shampoo scent is clear and fresh and it leaves your hair smelling even better
