**Presentation**
Reparil sugar-coated tablets:
Manufacturer’s pack of 40 sugar-coated tablets.

**Composition**
Reparil sugar-coated tablets:
1 sugar-coated tablet contains 20 mg amorphous aescin

**Mode of action**
Reparil sugar-coated tablets act as a selective anti-oedematous and anti-inflammatory agent.

**Indications**
Traumatic swelling (fractures, etc.);
To prevent and treat oedema resulting from surgical operations.
Painful lesions of the vertebral column (cervical syndrome, thoracic spine syndrome, lumbar disc syndrome);
For other indications in specialist practice, see Clinical Results.

Special note on Reparil sugar-coated tablets:
In accordance with the general regulations regarding the use of drugs in the first three months of pregnancy, treatment with Reparil sugar-coated tablets should not be started without careful consideration.

**Dosage**
Reparil sugar-coated tablets
The usual initial dose is 2 sugar-coated tablets
3 times daily, taken with a little fluid after meals.
In mild cases, or as a maintenance dose, it is enough to give 1 sugar-coated tablet 3 times daily.

*Dosage for children:*
1 sugar-coated tablet 2-3 times daily.
